EDUCATION

BACHELOR DEGREE

Saint Mary's University
2006 - 2009

JOURNALISM

Toronto Metro University
2009 - 2011

TECHNICAL WRITING

Simon Fraser University
2015

FULL-STACK DEVELOPMENT

Le Wagon Amsterdam
2022

KEY SKILLS

Web and mobile development

Restful APIs

Frontend UI/UX design

Backend architecture

PostgreSQL and NoSQL

Git and GitHub workflows

Agile and Scrum methodologies

Team / client collaboration

PROFESSIONAL PROFILE

I'm a **full-stack developer** with many years of experience building apps on various platforms. Previously I worked as a technical writer where I wrote, edited, and maintained digital content using an array of tools and programming languages. Since 2022, I've worked as a web and mobile developer and teacher at Le Wagon, where I train students how to use Ruby on Rails, JavaScript, HTML, CSS, and SQL. My [portfolio](#) includes apps I have built for clients, including a social media app for musicians, a cookbook app, and an education platform for elementary students.

RELEVANT EXPERIENCE

FULL-STACK DEVELOPER

Kanapé / Budapest, Hungary / 2022 – Present

Currently working with Kanapé to offer developer services to entrepreneurs and startups. I build original web and mobile applications for clients, planning UI layouts on Figma before delivering the project using Agile. Projects are version-controlled with GitHub and built with a modern stack (Rails, React/Angular, JavaScript, HTML, CSS, PostgreSQL, Redis, Cloudinary, Bootstrap, Sass, and Stimulus, or Java, Spring Boot, Kotlin, and Android Studio). In past projects I have implemented a variety of dynamic features, such as real-time messaging systems, user-generated content (posts and comments), and scheduled notifications. Key responsibilities include:

- UI/UX design and prototyping in Figma.
- Developing web and mobile apps with Ruby on Rails / Spring Boot.
- Implementing interactive frontend features with JavaScript.
- Managing databases and backend logic (PostgreSQL).
- Client collaboration, scoping, and timeline planning.
- Iterative delivery and progress reporting.

FULL-STACK DEVELOPMENT TEACHER AND LECTURER

Le Wagon / Campuses in Europe and online / 2022 – Present

I teach full-stack development at Le Wagon both online and at their various campuses across Europe (in the Netherlands, Belgium, Portugal, etc.). This includes:

- Preparing and giving lectures on Ruby on Rails.
- Guiding students through their daily coding challenges.
- Leading live-coding sessions at the end of the day.
- Ensuring students' progression throughout the course.

Students are trained in Ruby, JavaScript, HTML5, CSS6, PostgreSQL, GitHub, Figma, and Heroku. I have also taught public workshops and tutorials to promote the company (for example, showing hundreds of live attendees how to create a modern landing page). In addition to the main course, I've devoted significant time to training further skill development, teaching classes in languages and frameworks such as C#/.NET, Java, Spring Boot, React, Angular, Vite, and Vue.

SHAWN SUTHERLAND

F U L L - S T A C K D E V E L O P E R

MAIN STACK

Angular	Kotlin
APIs	Node.js
C#/.NET	PostgreSQL
Cloudinary	Python
CSS	React
Figma	Redis
Git	Rspec
GitHub	Ruby on Rails
Heroku	Sass (SCSS)
HTML	SQL
Java	Spring Boot
JavaScript	Stimulus
JSON	Ubuntu

ACHIEVEMENTS

CLOUD DIGITAL LEADER

Earned Google Cloud certification as a Cloud Digital Leader, demonstrating in-depth knowledge of the platform.

PROJECTS COMPLETED

Our team at KPMG delivered worldwide Omega and Leapfrog cloud-optimization projects in 2021, saving our clients millions of euros.

ACTIVE MEMBER OF KIVA.ORG

Since 2006, I have made over 100 micro-credit loans to up-and-coming entrepreneurs in the developing world

OTHER EXPERIENCE

TECHNICAL WRITER – MICROSOFT AZURE

KPMG International / Remote / **2019 – 2022**

At KPMG I helped optimize Azure cloud-based services for our member firms. As the sole technical writer on this project, I created, reviewed, and updated all documentation necessary for several workstreams. This included:

- Writing feasibility studies.
- Developing business cases for suggested upgrades.
- Creating gap analyses between new and existing applications.
- Designing architecture reference documents and user guides.
- Developing proof-of-concepts to validate future state models.

All documentation was written in close collaboration with subject matter experts and product owners. Deliverables were expected to be completed in accordance with our project roadmap and stored for easy access on SharePoint. While our office was in Amstelveen, Netherlands, I worked remotely.

TECHNICAL WRITER – TELECOMMUNICATIONS

Nokia Networks / Budapest, Hungary / **2014 – 2017**

At Nokia I created, edited, and updated technical documents for network service providers. My team and I worked in close collaboration with engineers and subject matter experts to ensure that our documentation was up to date. Our responsibilities included:

- Using XML editors to update text, tables, and figures in our documents based on changes to the network portfolio.
- Troubleshooting any errors in our documentation with JIRA.
- Completing projects based on an Agile development model while adhering to publishing deadlines.
- Using CMS tools to plan meetings, store information, archive technical reviews, and encourage best practices across departments.
- Ensuring our documents were DITA-compliant to make them easier to read and to allow for content reuse and single-sourcing.
